

Penetration Tester (m/f/x)

Skills

- Proven skills in creatively exploiting bugs in systems
- Strong analytical skills required
- Highly motivated to identify and implement possible attacks to high secure solutions
- M.Sc. or PhD in Information Technologies is a plus

Tasks

- Identify possible attack vectors by analyzing the soft- and hardware architecture of our solution
- Identify bugs of the system (with and w/o code access)
- Support the team by avoiding bugs/design issues
- Implement possible (side) attacks for the system
- Pen-testing of embedded IT solutions
